

SkinnyPatch® 6 UTP Modular Cords

Regional Availability - North America

Siemon's SkinnyPatch 6 Modular Cords deliver category 6 performance with a reduced cable diameter for improved airflow and increased flexibility in high-density patching areas. The cord's smaller 28 AWG stranded copper construction offers a significantly tighter bend radius for easier cable routing and enhanced cable management, providing pathway space savings in racks and cabinets while facilitating moves, adds and changes in tight spaces. These cords also feature Siemon's patented metallic isolator for exceptional NEXT performance and innovative 360-degree crimp for excellent plug-to-cable strain relief. SkinnyPatch 6 UTP Modular Cords fully support Category 6/Class E channels backed by Siemon's 25-year system warranty.

Color Coding

Optional colored clips enable field color coding and can be easily snapped into place without having to disconnect cords.

Excellent Bend Relief

Boot and integrated strain relief ensures minimum bend radius for category 6 performance.

Improved Airflow

Offers improved airflow, accessibility and cable management in high-density applications.

Diameter

Smaller diameter cable significantly reduces bundle and pathway fill for space savings.
